Art Unit: 2115

1. This action is in response to the application that was received on February 24, 2004. Claims 1-13 are pending.
2. The drawings received on February 24, 2004 have been approved by the examiner.
3. The following is an examiner's statement of reasons for allowance:

The cited references describe portable computer systems that adjust the processor clock frequency and/or processor voltage. References 6,845,456, 2004/0128567 and 2004/0117680 describe using a table to determine the frequency or a voltage/frequency pair for a processor. None of the cited references describe the clock generator recited in claim 1. None of the cited references describe the procedure of determining the operational frequency and operational voltage for a desktop processor in a notebook computer as recited in claim 10.

The claimed invention is allowable over the art of record because the art of record does not teach or suggest a method or apparatus for saving power in a portable computer with a desktop type processor comprising the interconnected elements recited in claim 1 or the interrelated method steps recited in claim 10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
